EXAMINER'S AMENDMENT

1. Claims 1-12, and 14-15 are pending in the instant application.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher R. Lipp (41157) on July 6, 2005.

The application has been amended as follows:

Regarding claim 14, in line 1, "a tone a phase" is replaced by --a tone, or a phase--.

Regarding claim 15, in line 4, "whether the tone or the phase change" is replaced by --whether the information signal, the tone, or the phase change of the tone--.

Claims 1-12, and 14-15 are renumbered respectively as claims 1-14, and the claim dependency is renumbered accordingly.

Allowable Subject Matter

3. Claims 1-12 and 14-15 renumbered respectively as claims 1-14 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claims 1-12 and 14-15 renumbered respectively as claims 1-14 are allowed because the prior art of record does not disclose or obviate the limitations of the independent claims. While several references such as Li et al (US 6556674 – previously cited) disclose a method of detecting a tone by dividing a signal into frames having an adjustable length set to ensure accurate detection of the tone (col. 6, lines 1-45) and transforming the frames into the frequency domain to detect the tone, the references do not disclose or adequately teach selecting a predetermined number of blocks to be processed for detection. That is, the prior art of record may divide a signal into adjustable blocks to ensure accurate detection of a tone, but there is no proper motivation to select only some of the blocks for processing. Furthermore, while the prior art references listed in the PTO-892 filed January 21, 2005 are related to the detection of a tone (specifically DTMF tones), the prior art references cited in prior office actions (before January 21, 2005) are related to the detection of an information signal. However, among these cited references of the prior art, no proper motivation exists to combine their features to arrive at the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
